

PRITTHISH NATH

Full-Stack Software Engineer

Kolkata, West Bengal, India

hi@pnath.in — +91 9557937140 — [LinkedIn](#) — [GitHub](#)

Profile Summary

Full-Stack Engineer with 3+ years building and scaling SaaS products at startups. Currently leading architecture for a 20K+ subscriber newsletter platform and building Meshploy, an open-source self-hosted PaaS. Proven track record of shipping 0-to-1 products and driving significant system-wide performance improvements.

Experience

Plutonapps (WhiteRose Lab Pvt. Ltd.)

Kolkata, India

Full-stack Developer

Apr 2024 – Present

- Leading the architecture and development of a scalable newsletter publishing platform for 20K+ subscribers while mentoring a team of 2 developers.
- Reduced analytics query time by 70% (from 8s to 2s) by integrating ClickhouseDB columnar database to power real-time dashboards across multiple SaaS platforms.
- Improved system reliability by 40% through implementing dead-letter queue patterns in RabbitMQ for fault-tolerant event processing and automated retry mechanisms.
- Developed a dynamic workflow automation builder using Restate for users to create complex, long-running execution sequences that automatically recover from network and server interruptions.
- Eliminated 60% code duplication by architecting shared component library and database schema modules distributed as NPM packages across frontend, backend, and worker services.
- Achieved 100% cross-stack type safety by automating TypeScript-to-GraphQL schema conversion.
- Set up distributed tracing with OpenTelemetry/SigNoz and standardized CI/CD pipelines, reducing bugs and code review time by 50%.

Independent Consultant & Entrepreneurship Exploration

Oct 2022 – Apr 2024

- **Freelance consulting (Dec 2023 – Apr 2024):** Optimized client's website performance (85% load time reduction, GTmetrics grade D to grade A), built and deployed Next.js archive site with CMS integration, containerized 10+ projects with CI/CD pipelines, and deployed open-source IDP tools reducing deployment and troubleshooting time by 40% (from 4–5 days to 2 days).

TCM Stunner IT Consultants LLP

Kolkata, India

Full-stack Software Engineer

Feb 2022 – Oct 2022

- Implemented WebRTC-based push-to-talk communication platform (DSky) with group audio broadcasting and P2P video calls with recording using Socket.io, Mediasoup SFU and FFmpeg that could support 100+ concurrent users.

Projects

Meshploy

meshploy.com

Open-source self-hosted PaaS · Go · K3s · WireGuard · React · PostgreSQL

- Built a Go reverse proxy as the routing foundation of the platform rather than an add-on to deployments. Anything running on the mesh can receive traffic through it, whether Meshploy deployed it or not, and adding a route is a single PostgreSQL-backed API call.
- Designed the network around WireGuard (via Headscale) so any server on any cloud provider or home lab can join the K3s cluster with one outbound connection and stay completely private. Worker nodes have no public ports and no exposed services. Only the gateway faces the internet.
- Ran CoreDNS as a self-hosted DNS server so Caddy could issue and renew wildcard TLS certificates via DNS-01 automatically, with no dependency on Cloudflare or any external DNS provider.
- Shipped a full product with Claude Code as the primary coding assistant: managed databases as Kubernetes workloads, container image builds and deployments, traffic routing, scheduled jobs, automated backups, real-time node and container monitoring, a WebSocket-based terminal for any node or pod, an MCP server for AI-native platform management, Git-triggered deployments, and granular access control across projects.

Technical Skills

Languages: TypeScript, JavaScript, Go (Golang), SQL

Frontend: React, NextJS, TanStack Router, TanStack Query, Redux, Jotai, React Flow, Tailwind CSS

Backend: Node.js, Bun, Express, Hono, REST, RPC, GraphQL, FastAPI, Restate

Real-time: WebRTC, WebSockets, Mediasoup SFU, Firebase Cloud Messaging

Database & ORM: Drizzle, Mongoose, PostgreSQL, MongoDB, ClickhouseDB, Redis

DevOps: Docker, Kubernetes, k3s, GitHub Actions, GitLab CI, Linux, Caddy, Nginx, AWS, ECS, Wireguard

Education

Amity University (Distance Learning)

Bachelor of Finance & Investment Analysis, CGPA: 8.8

2019 – 2022
